

## CLEAN VERSION OF PARAGRAPH INCORPORATING CHANGES MADE

Page 29, line 21 – page 30, line 6:

A2  
Reflection angles at the specular reflector 10d may be appropriately determined based on the configuration of switches in accordance with the purposes. In addition to the reflection member to reflect light provided with an inclined surface having predetermined angle as shown in Figs. 1 (a), (b), and (c), the reflection member may include: for example, a plate optical path-changing member 10 arranged in a flat condition at an angle of  $0^\circ$  as shown in Fig. 9. Incidentally, the optical path shown by a broken line in Fig. 9 shows an optical path when the optical path-changing portion 8 is brought into contact with the light transmission portion 1.
